

This document illustrates all the capabilities within the scope of KRP BTC:

**What Norma needs from you:**

1. List of address/es (interchangeable lingo with “Wallet ID”)
2. Deadline

**What do you need Norma to do:**

- ☐ Verification of transactions on the blockchain
- ☐ Categorize transactions as sent or received (debit/credit view mode)
- ☐ Get daily token prices and historical data
- ☐ Get unrealized gains/losses per transaction\*
- ☐ Get address (interchangeable lingo with “wallet”) balance at year-end
- ☐ Flag suspicious tokens, such as scam tokens.
- ☐ Ownership ceremony rollback (can someone explain to me what this actually means)
- ☐ Revenue testing models\*
- ☐ Mining calculators dependant of client’s hardware
- ☐ Filter transaction activity and balance by custom dates
- ☐ Analyze whitepapers
- ☐ Explain concepts that you might struggle with

- 
- ☐ Record macros of repetitive tasks on excel
  - ☐ Write scripts using autohotkey to automate whatever you need
  - ☐ Open to anything

CHARTERED PROFESSIONAL ACCOUNTANTS

\*Get unrealized gains/losses per transaction: estimate value, as daily prices also fluctuate.

\*Revenue testing models: defined as taking a sample of transactions (can someone explain further?)
